PROFILE

Senior software engineer and former team lead building products across React, TypeScript, Node.js and PostgreSQL. Experience spans real-time trading, manufacturing operations and financial services, alongside an independently operated mobile app with **100K+ Android downloads**. Hands-on across interfaces, APIs, data models and release delivery, with experience in distributed international teams.

EXPERIENCE

Jedidiah Equipment

May 2026 - Present

Full-Stack Engineer (Contract)

- **Own delivery of JedidiahOps**, a manufacturing operations platform spanning React web, React Native mobile, a Fastify/tRPC API and PostgreSQL.
- Connect quoting, production planning, material requirements, purchasing and stock movements in a shared workflow, translating business requirements directly into software.
- Separate equipment and contracting operations within one platform using distinct database schemas, server-side permissions and enforced module boundaries.
- Build mobile workflows for job progress, inventory and machine-hour capture, including offline reading synchronisation for contracting operations.
- Build an AI assistant that helps staff find products, manage quotes and check job progress, with access governed by their existing permissions.

Edge

October 2024 - June 2026

Senior Software Engineer | Remote

- Built React/TypeScript trading, scanner, discovery, wallet and watchlist interfaces, alongside API and real-time order-update workflows.
- Implemented discovery subscriptions with **event batching, pair-level deduplication and compressed payloads**; avoided emitting updates when no clients were subscribed.
- Integrated TradingView with custom OHLC APIs for swap-derived candlesticks, live chart updates, saved layouts and token/order overlays.
- Delivered data-heavy interfaces using virtualized tables and lists, memoized cells, Zustand and TanStack Query; worked across Kafka-backed events, WebSockets, tRPC subscriptions and RisingWave queries.

EXPERIENCE CONTINUED

Monax Labs

June 2020 - October 2024

Team Lead / Senior Software Engineer | Remote

- Led a **team of six** delivering Aspen, a creator-commerce and membership platform, while remaining hands-on across frontend, backend services, shared schemas and blockchain integrations.
- Delivered white-label storefront tooling for creator-owned collections, custom branding, membership management and minting flows.
- Built decentralised NFT trading workflows using pre-signed orders and custom 0x smart contracts.
- Mentored engineers, reviewed code and guided technical decisions and delivery across product priorities in a distributed team.

Kurtosys Systems

October 2018 - June 2020

Senior Software Engineer | Cape Town, South Africa

- Delivered full-stack financial-services features for clients including BMO, Federated Hermes and Bank of America Merrill Lynch.
- Worked end-to-end across database migrations, backend services and frontend interfaces, with code review and mentoring in a regulated financial-services environment.

INDEPENDENT PRODUCT

K53 Study Guide

2018 - Present

Creator and Sole Developer | k53studyguide.online

- Built and operate a mobile learning app with **100K+ Android downloads**; own development, premium purchases, analytics and Android/iOS store releases.
- Implemented study material, practice quizzes, mock tests and progress tracking using React, TypeScript, Ionic and Capacitor with native mobile integrations.
- Integrated RevenueCat with legacy-purchase synchronisation and regression tests that **protect existing premium access** when synchronisation fails.
- Instrumented engagement and the purchase funnel with Firebase/GA4, added Crashlytics monitoring, and maintain native configuration, signing and release requirements.

TECHNICAL SKILLS

Frontend and mobile: React, TypeScript, JavaScript, React Native, Ionic, Capacitor, Zustand, TanStack Query.

Backend and data: Node.js, Fastify, PostgreSQL, SQL, tRPC, GraphQL, WebSockets, Kafka, RisingWave.

Delivery and tooling: Git, Docker, Vitest, automated testing, code review, Firebase, GA4, Crashlytics, RevenueCat.
